Quick Heal Mobile Security

Anti-Theft Security. Real-Time Protection. Call & SMS Blocking.

Product Highlights

With an easy-to-update virus protection and a dynamic yet simple interface, virus removal from your mobile has never been this easy!

- ▶ Block unwanted calls and filter unwanted SMS thus saving time and accruing productivity.

- ▶ Powerful AntiVirus engine results in improved device performance so you spend less on mobile maintenance.

- ▶ Software simplifies configuration with easy-to-use mobile handset interface.

- ▶ Access to email and technical support from your mobile device.

- ▶ Facilitates sharing of the application installer file to other devices conveniently.

Feature List

Quick Heal Mobile Security helps you save time and ensure productivity by effortlessly blocking unwanted calls and SMSs. Its unique and enhanced Anti-theft security protects your lost or stolen device from being misused.

SCAN DEVICE

This flexible feature offers the following functionalities:

- ▶ **Quick Scan** – This is an on-demand scan that starts scanning your mobile device at your request.
- ▶ **Custom Scan** – This gives you multiple scanning options such as:

    Full Scan – thoroughly scans your mobile device and its memory card.

    Scan All Apps – scans all the applications installed on your device.

    Scan Selected Apps - scans applications selected by you.

    Scan Memory Card – scans only the memory card.

    Scan Selected Folders – scans folders selected by you.

▶ **Schedule Scan**

This option allows you to schedule a virus scan at a time that is convenient for you. It offers:

- ◎ **Scan Types to Schedule -**
  - Full Scan
  - Scan All Apps
  - Scan Selected Apps
  - Scan Memory Card
  - Scan Selected Folders

- ◎ **Scan Frequency**

  You can choose from the following frequencies for this type of scan:
  - **Scan while charging** - Scans your mobile device while it is being charged. For the scan to begin, your device battery must be 50% or more and the scan occurs once every 24 hours.
  - **Once a day** – You can choose the time for the scan to begin.
  - **Once a week** – You can choose the day and the time for the scan.
  - **Once a month** – You can choose the date and the time for the scan.

▶ **Security Advisor**

The Security Advisor guides you about the settings that affect the overall security of your Smartphone and redirects you to the respective screen to change the settings.

Different Security Advisor settings are:
- ◎ Accounts and Sync
- ◎ Bluetooth
- ◎ Device Memory Encryption
- ◎ Hotspot and Tethering
- ◎ Quick Heal Anti-theft
- ◎ Quick Heal Background Scan
- ◎ Screen Lock

- ◉ Unknown App Sources
- ◉ USB Debugging
- ◉ Wi-Fi

▶ **Privacy Advisor**

Privacy Advisor notifies about the apps that could affect your privacy. It also helps you review the permissions used by these apps, and you can decide whether you want to keep the apps or not. The feature monitors apps with permissions such as:

- ◉ Access to Accounts
- ◉ Access to Contacts
- ◉ Read Identity Info
- ◉ Tracking Location
- ◉ Access to Messages
- ◉ Access to Network

SET PRIVACY

The Set Privacy feature allows you to protect your privacy with the following functionalities:

▶ **Call and Message Filter**

With this feature you can easily block incoming calls and SMSs from unknown or unwanted numbers. And now, you can also use this feature to block all numbers belonging to a particular series. For instance, if you block the series "8007", all phone numbers beginning with this series will be barred from reaching you.

▶ **International Call Block**

With Quick Heal Mobile Security, you can now also block unknown International calls.

▶ **Message Exception List**

This list displays non-numeric senders that are excluded from SMS blocking.

▶ **Register With TRAI**

This feature offers the following benefits:

- ⊙ **Fully Block** – Blocks all telemarketing calls and SMSs.
- ⊙ **Partially Block** – Blocks all telemarketing calls, and category based SMSs.
- ⊙ **Report A Number** - Allows you to raise a complaint with TRAI against unwanted telemarketing calls and SMSs.

MESSAGE CENTER

Displays important notifications which require your attention. The Message Center also displays the latest news, updates, and important alerts from Quick Heal lab.

REMOTE DEVICE MANAGEMENT

This feature helps you manage your lost or stolen device via Quick Heal's Remote Device Management Portal. From this portal, you can perform the following actions:

- ⊙ Remotely lock, unlock, and erase data from your phone.
- ⊙ Track your phone's location.

ACTIVITY

Get in-depth reports on all the activities carried out by Quick Heal Mobile Security on your Android device. These include reports on:

- ⊙ Virus detections
- ⊙ Blocked SMSs

- Blocked calls
- Activities related to anti-theft
- Updates taken for virus definitions

REGULAR AUTOMATED VIRUS UPDATES*

Takes automatic virus definition updates, so that your device remains secured from new and emerging security threats.

CALL FORWARDING

Helps you set a number to which all your incoming calls will get forwarded. You can also set this number by sending an SMS or via your RDM (Remote Device Management) account.

Note: This feature may not work on SIM cards in secondary SIM slots.

BACKGROUND SCAN

Provides automatic real-time virus and spyware scans with optional manual scan.

- Ensures automatic protection from all kinds of malware threats.
- Scans applications when they get installed on the mobile device.
- If you have to use another memory card, the anti-virus engine scans the memory card before transferring any data.
- Allows you to use your mobile device while the scan runs in the background.
- Can be configured to exclude applications from scanning.
- Can be configured to exclude folders from scanning.

SHARE APP*

With this feature, you can easily share your Quick Heal Mobile Security application with other Android devices. For this, you can use Bluetooth, Wi-Fi Direct, or NFC. You can also use other apps that allow application sharing between mobile devices.

ANTI-THEFT

Quick Heal's anti-theft technology prevents your device from being misused. It allows you to lock your device or erase its entire data remotely, if it gets lost or stolen. The technology offers the following layers of advanced protection to your Android:

▶ **Remote Locking**

Makes your phone unusable if it gets lost or stolen.

▶ **Mobile Tracking**

Helps in locating your lost or stolen device.

▶ **SIM Change Notification**

If your device's SIM is changed, the new number will send an SMS to your alternate mobile number notifying about the SIM change.

▶ **Block phone on SIM card change**

If the SIM card of your Smartphone is changed, Quick Heal's anti-theft feature will lock the phone and make it unusable.

▶ **Remote Data Wipe**

Helps you delete data on your phone remotely.

PERSONAL SECURITY

This feature can help you in times of emergency. If you press the power button of your phone 3-5 times, this feature activates the emergency mode. In this mode, an SOS message with your current location will be sent to alternate contact numbers set during the time of registration. Your Facebook and Twitter status will also get updated with an SOS message.

Before the emergency mode gets activated, you will be given a time frame of 10 seconds. Within this time period, you can choose to cancel or continue with the emergency mode.

INTRUDER DETECTION

If someone enters a wrong password 2 times consecutively (to unlock your device's lock screen), this feature will take snapshots using the front and rear camera.

SECURITY SHIELD

The Security Shield displays the security level of your device and data through a graphical representation. By tapping this shield, you can configure the security settings of your device.

- The orange circle indicates the current level of security on your device.
- The check mark inside, indicates that your device is in a completely secured state. An exclamation mark would indicate that your device is unsecured.

TRUSTED SIMS LIST

Add multiple SIM numbers to Trusted SIMs List. This feature is beneficial for users using multiple SIMs. When the SIM is changed, the device is not blocked if its entry is present in the Trusted SIM list. Fifty (50) SIM numbers can be added to this list.

QUICK SETTINGS NOTIFICATION

This feature gives you quick shortcuts to various setting options on your device such as:

- ⊙ Wi-Fi
- ⊙ Bluetooth
- ⊙ Mobile Data
- ⊙ Brightness
- ⊙ Torch

NEWS

Get latest news on mobile protection, security alerts, and other important information related to IT security.
