# Fonetastic

Not just an app, but a friend for your phone.

## Product Highlights

Fonetastic is an all-in-one app for Android devices. Built with multiple productivity and security features, it enhances your device battery life and performance, and lets you block unwanted calls and messages.

- › Helps your device perform faster
- › Enhances your phone's battery life
- › Fights Android viruses and malware
- › Tracks your phone if lost or stolen

## Features

### Optimization

#### Speed

Enhance your device performance by killing running apps that are idle and not being used.

#### Battery

Keep a track of your device battery life, and kill running apps that drain battery power. Notifies you with an alarm sound when battery level becomes critically low. You can configure settings and disable unnecessary apps that consume too much battery.

#### Data Usage

Track and set your cellular data limit to manage your data usage. This helps you ensure that your data is not used unnecessarily. You can set your data plan depending on your monthly or weekly requirement. After you set the plan, you can view the remaining days and mobile data.

## Floating Window

An easy shortcut that lets you free up RAM, kill running apps, and toggle between shortcuts like Wi-Fi, Ringtones, Bluetooth, Cache Cleaner, and more. The Floating Window icon can be viewed on the Home and App list screen of the device. Tapping the icon launches a window that displays a Status Button, Switch ring, and App ring.

- › **Status button:** displays the percentage of RAM consumed by apps currently running in the device. Tapping the button frees up the RAM.
- › **Switch ring:** lets you toggle between shortcuts such as Wi-Fi, Bluetooth, Torch Light, Brightness, Ringtones, Battery, and Cache Cleaner.
- › **App ring:** displays apps that are currently running in the device. An app can be killed by tapping on it; this boosts the device speed.

## Privacy

### Block Numbers

Block calls and messages from known and unknown numbers. You can blacklist numbers starting or ending with a particular series. Spam messages can be blocked based on the keywords you provide. You can block international numbers, and report any unwanted number to TRAI (Telephone Regulatory Authority of India).

### Privacy Advisor

Identify apps that might cost you money, harm your privacy, access the Internet or affect the overall security of your device. You can have a consolidated view of apps with various permissions like access to location, identity info, networks, personal data, accounts, device admin, etc.

Depending on the permissions an app asks for, you can decide whether to keep it or uninstall it.

### Vault

Keep your personal images, confidential documents, videos, and apps private by keeping them in a password-protected folder.

## Security

### Vulnerability Scan

Certain mobile apps installed on your phone might have security vulnerabilities which hackers can take advantage of. This feature of Fonetastic detects such vulnerabilities and brings them to your notice.

### Fingerprint Unlock

Lets you unlock your phone using your fingerprint.

### Antivirus

Protect your device against malicious and harmful apps with real-time virus scans, scheduled, background, and cloud scans. View the list of threats detected during the scan under categories such as Unresolved, Resolved, and Quarantined.

### Anti-Spam

This feature helps you view and delete spam messages.

#### Note:

- If the count of spam messages reaches 10 or more, a notification card will be displayed at 9:00 AM for every 7 days.

- This card will be displayed only if the 'Block Numbers' feature is ON.

### **Anti-Theft**

Remotely lock your lost or stolen device and wipe its data by sending predefined messages. You can also track your phone's location on a map. If your device SIM card is changed, you will get a notification on your alternate contact number. A part of this feature is Intruder Detection. It captures photos of anyone who attempts to unlock your device using a wrong password. You can also enable the anti-theft feature to lock your device if its SIM is changed, record video or audio of its nearby surrounding if it gets lost or stolen.

### **Secure Camera**

Click photos using this feature, and they will be saved in the Gallery Vault automatically. Create a Secure Camera Shortcut on the device home screen to use the feature.
