# Seqrite
AntiVirus for Linux

AntiVirus for Linux Desktops and Servers

Seqrite AntiVirus for Linux shields your Linux systems against malware. It offers On-demand and Schedule scanning, Samba Share protection, and Web Security. The Advanced Device Control enforces a complete governance over the use of removable storage devices, which helps to keep your system safe and secure. Seqrite AntiVirus for Linux is easy to use and supports wide range of 32-bit and 64-bit Linux distributions that includes Red Hat, Fedora, Ubuntu, Linux Mint, SUSE, CentOS, and BOSS.

Why Seqrite AntiVirus for Linux?

1

On-demand and Scheduled scan to keep your Linux systems secure
On-demand and Schedule scan features helps you to scan the system when required or as per scheduled frequency.

2

Web security and filtering
Seqrite AntiVirus for Linux blocks access to malicious and phishing websites or blocks access to certain categories of websites such as social networking, gaming, etc.

3

Enforce device control
Enforce control over the usage of storage or wireless devices, and prevent data loss via removable devices. Scans USB storage devices as soon as they are plugged into the system.

4

Compatibility with multiple distributions
Simple and easy to use interface. Seqrite AntiVirus for Linux supports wide range of distributions such as Red Hat, Fedora, Ubuntu, Linux Mint, SUSE, CentOS, and Boss.

Feature Description

Core Protection

AntiVirus
Offers protection against malware and keeps your system secure.

Powerful Scanner

GUI Scanner
Create scheduled scan that can run automatically at given date and time, and scan the packed as well as archived files. It provides multiple options that you can select and scan.

Command Line Scanner
Schedule the scan for selected files and folders, and set appropriate action items using various commands.

Web Protection

Browsing Protection
Blocks access to malicious websites.

Phishing Protection
Blocks access to phishing websites.

Web Filtering
Blocks access to certain categories (social networking or gaming) of websites or an individual website or exclude a website even though its category is blocked.

Detailed Reports

Scan Report
View the detailed information of virus scan incidents.

Update Report
View the logs of update.

Device Control

Advance Device Control
Enforce control over the use of storage or wireless devices, Bluetooth, etc. that are connected to the system.

External Drive Scanning
Scans USB storage devices as soon as they are plugged into the system.

SAMBA Protection

Samba Share Protection
Seqrite Linux AntiVirus provides SAMBA Shares; a popular way of sharing documents in Linux environment. It enables user to scan files as soon as they are copied to SAMBA Shares and thus helps to prevent any kind of virus infection from spreading.

System Requirements

Hardware Requirements:
- Intel based processor (or compatible), 300 MHz or Higher
- 1 GB hard disk space
- RAM:
- Minimum: 512 MB
- Recommended: 2 GB or more

Software Requirements:
32-Bit:
Supported Versions:
- GNU C Library 2.11 and later
- SAMBA version 4.2.x and earlier
Supported Distributions:
- BOSS 6
- Fedora 14, 18, 19, 20, 21
- openSUSE 11.4, 12.2, 12.3
- Linux Mint 13, 14, 15, 16, 17.3
- Ubuntu 10.10, 11.4, 12.04 LTS, 12.04.3 LTS, 13.04, 13.10, 14.04, 14.10, 15.04
- CentOS 6.3, 6.4, 6.5
- RHEL 6.1, 6.2, 6.3, 6.4, 6.5, 6.6, 6.7, 6.8

64-Bit:
Supported Versions:
- GNU C Library 2.5 and later
- SAMBA version 4.2.x and earlier
Supported Distributions:
- Fedora 14, 18, 19, 20, 21
- openSUSE 11.4, 12.1, 12.2
- Linux Mint 13, 14, 15, 16, 17.3
- Ubuntu 10.10, 11.4, 12.04.2 LTS, 13.04, 13.10, 14.04, 14.10, 15.04
- CentOS 6.3, 6.4, 6.5
- RHEL 6.1, 6.2, 6.3, 6.4, 6.5, 6.6, 6.7, 6.8, 7.0,7.1, 7.2
- SUSE Linux 11.00, 12.00
