

# ADO Enrollment Using QR Code

The device owner provisioning is a method to assign Seqrite MDM Client the device ownership. Such device can have ADO enrollment using QR Code. You can assign the device ownership to the new devices or after factory reset of the device.

## Prerequisites

- New device or factory reset the device
- Device operating system's version should be 7 or later

To assign Seqrite MDM Client your device ownership, you must follow these three steps:

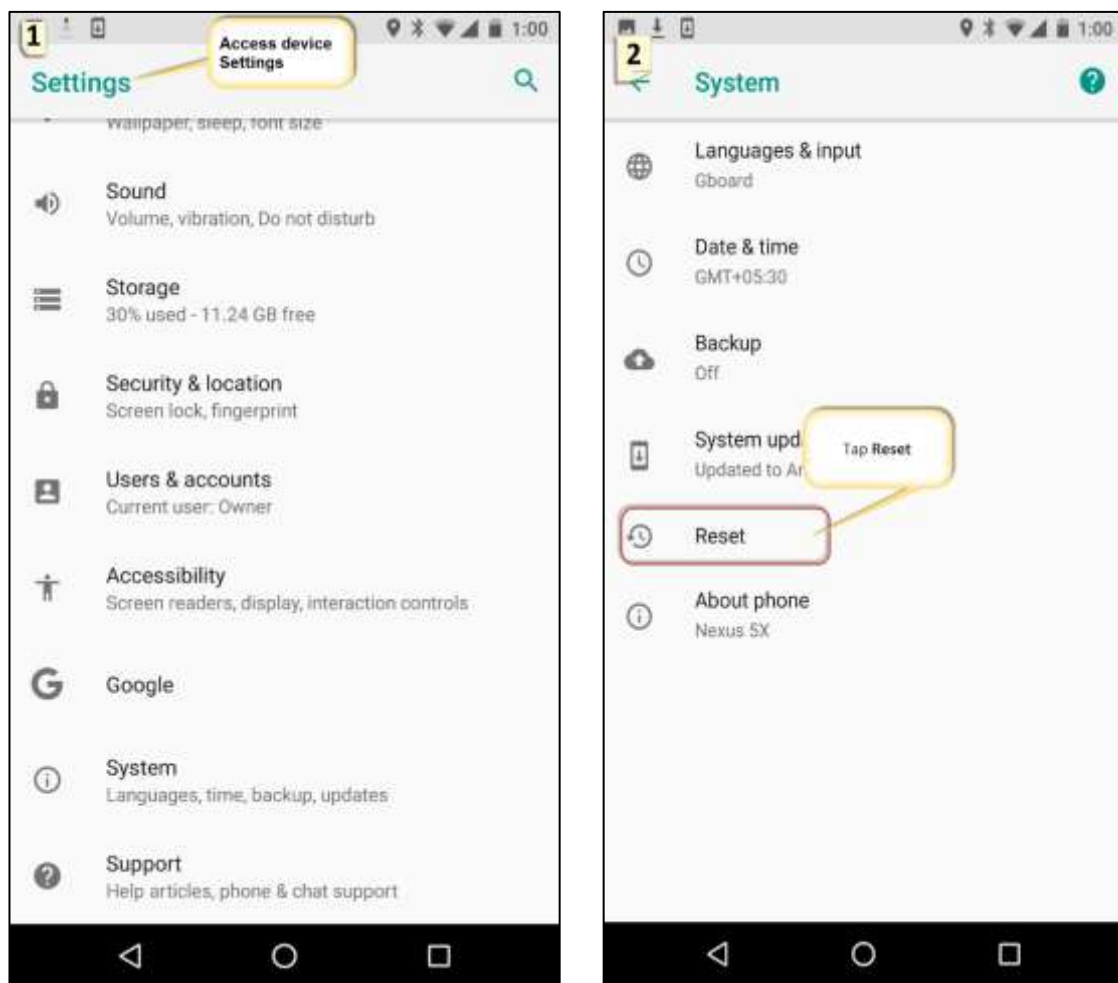

1. Use a new device or [factory reset](#) your device
2. [Provision](#) (assign Seqrite MDM Client your device ownership) your device using QR code
3. [Enroll Seqrite MDM Client](#)

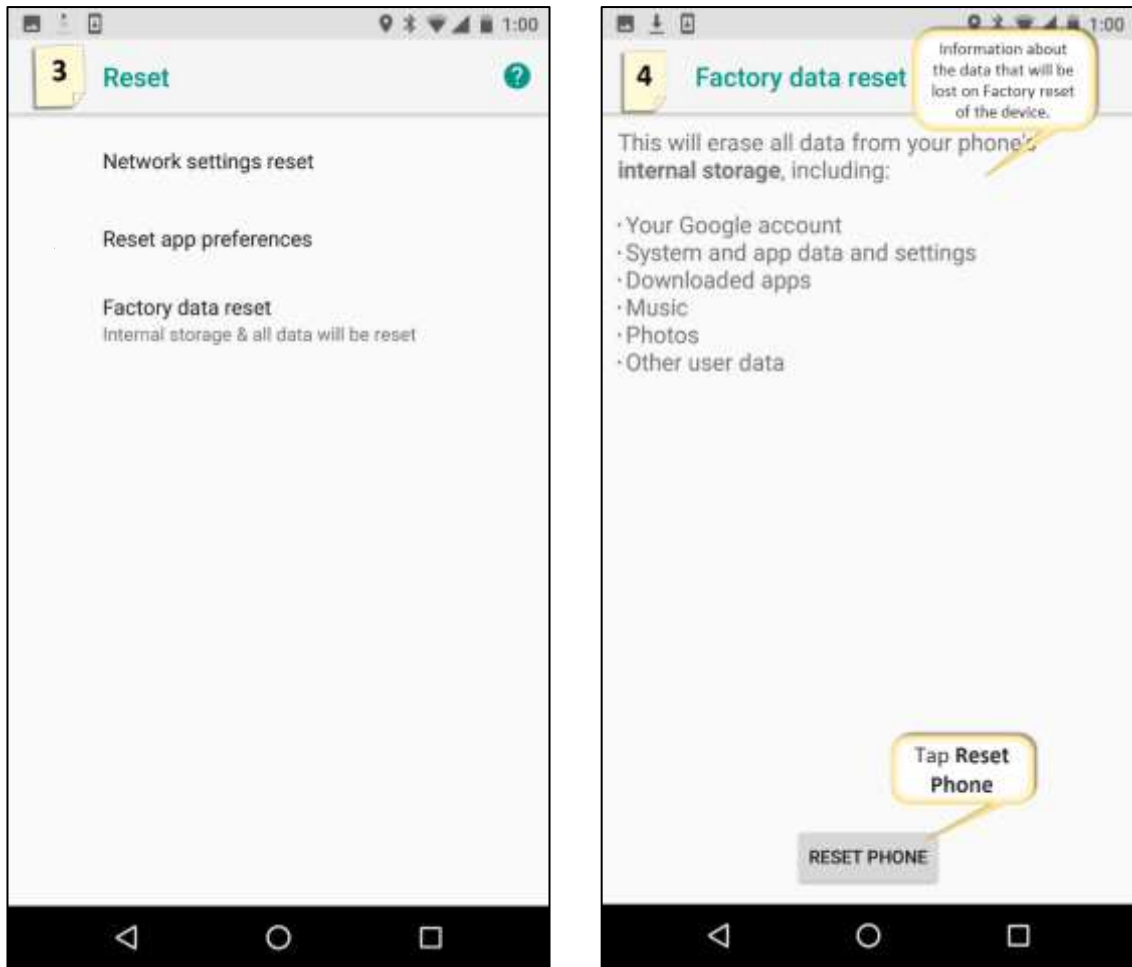

## Factory reset your device

With Factory Reset, you will permanently delete all your personal data.

If you want to factory reset your device, follow these steps:

- On device, tap **Settings > System > Reset**. Please note that the terminology in your device may differ.

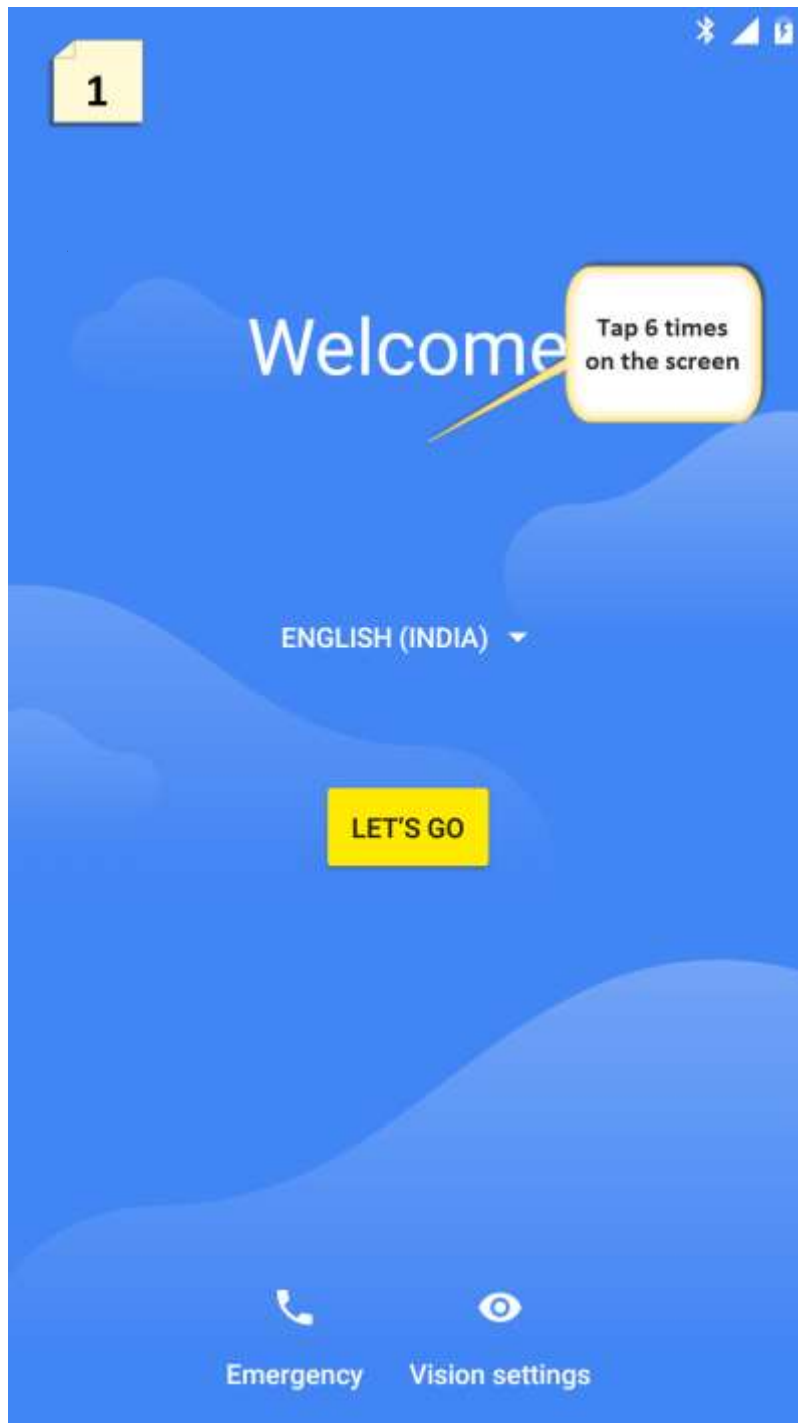

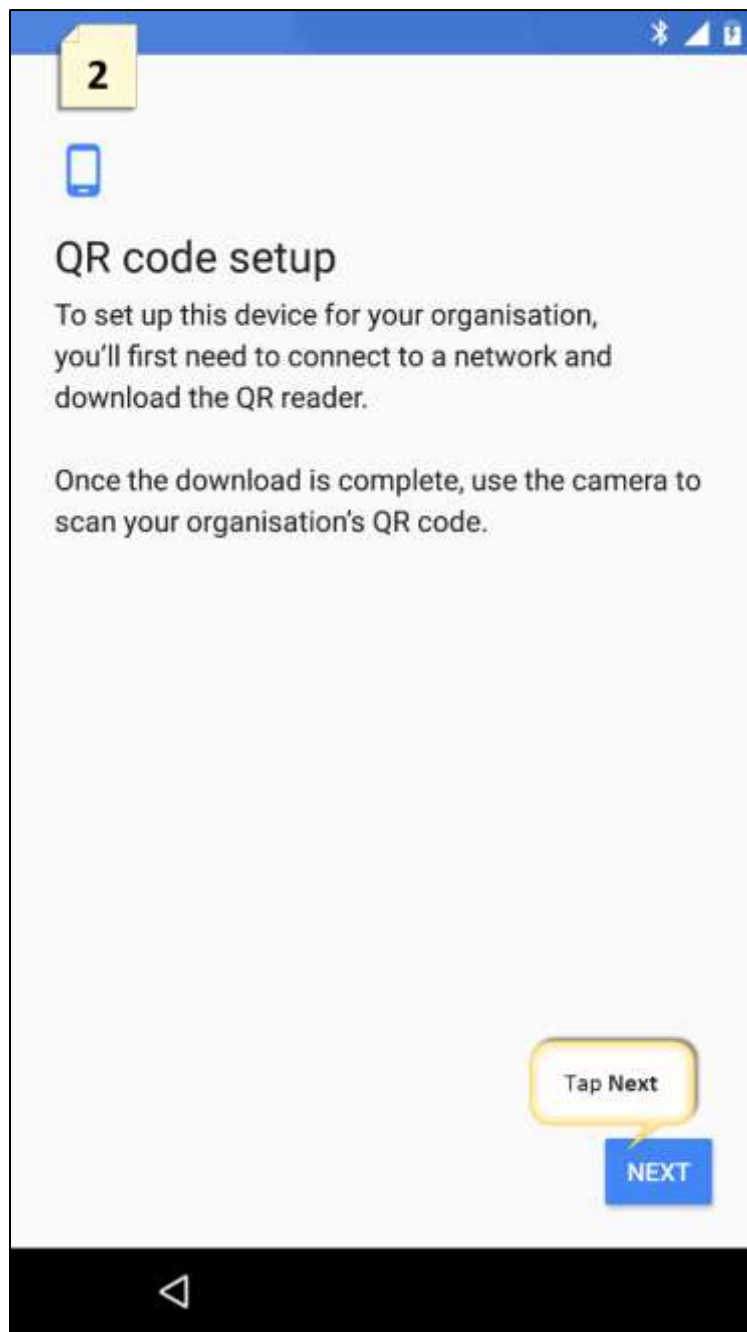

### Provision your device using QR Code

After factory reset, assign Seqrite MDM Client the device ownership with the following steps:

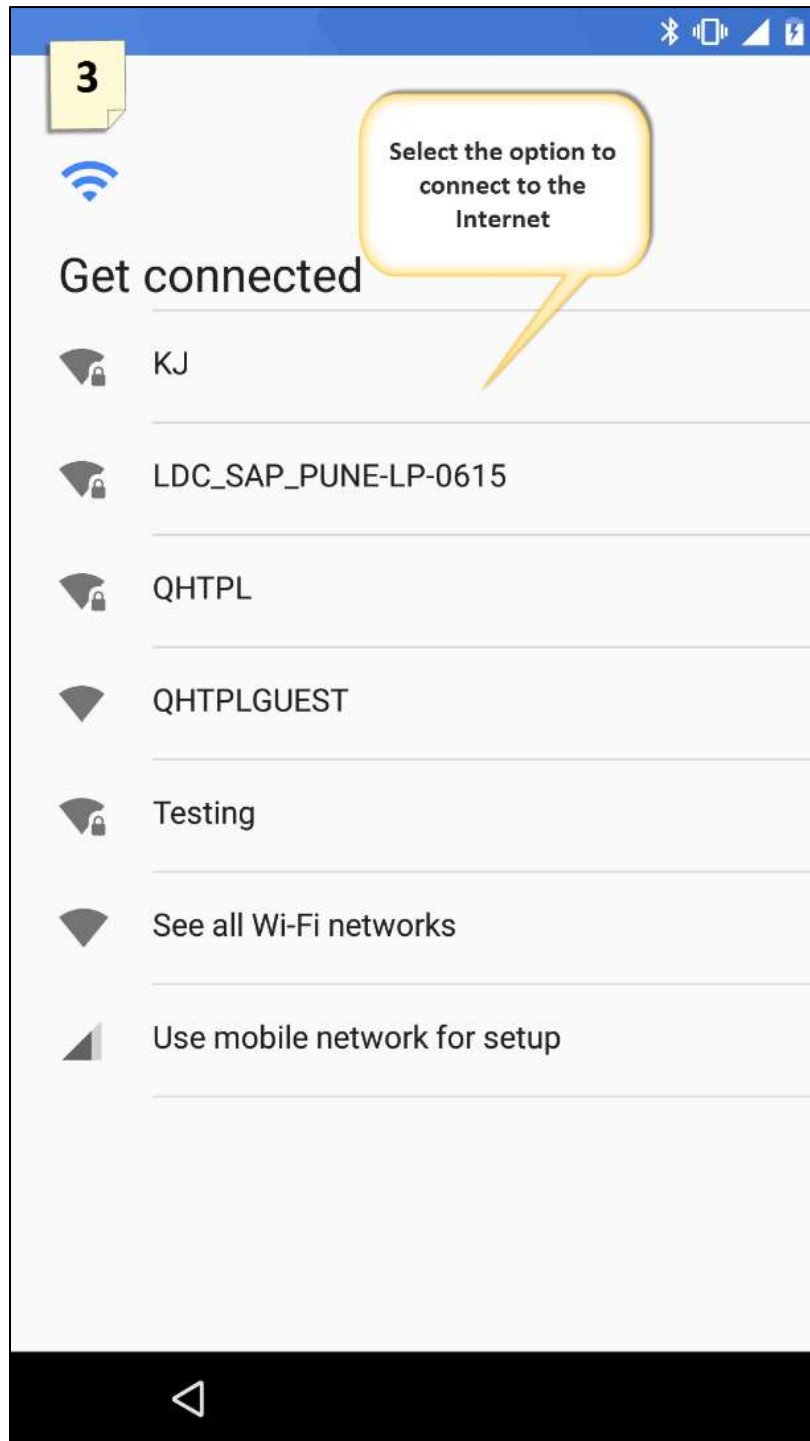

1. After factory reset of the device, a Welcome screen is displayed.
2. On the Welcome screen, tap 6 times. Make sure you tap on the screen as shown in the figure.

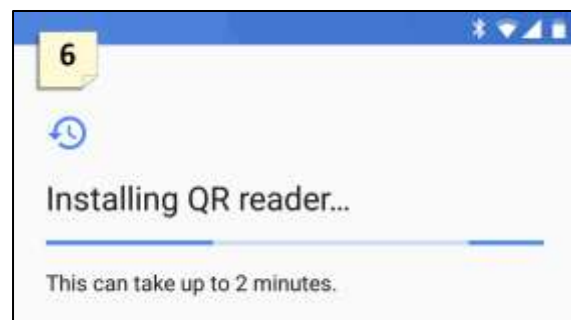

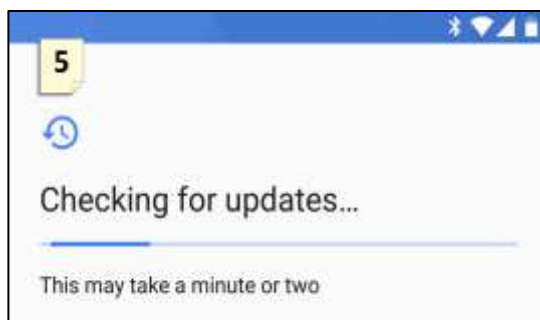

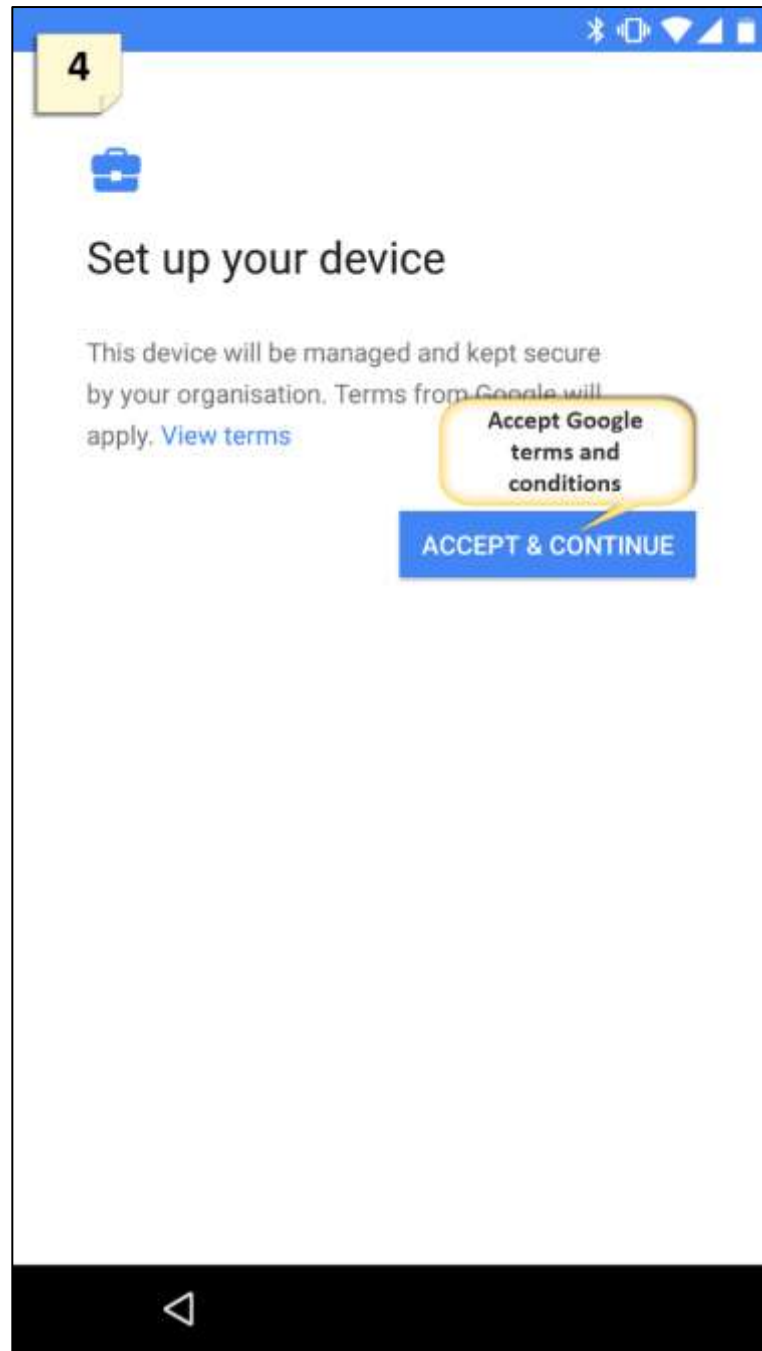

3. The setup wizard prompts you to connect to the Internet and download a QR code reader. In QR code setup screen, tap **Next**.

4. In Get Connected screen, choose the appropriate option to connect to the Internet.

5. After connecting to the Internet, the Google Play services downloads a module that contains a QR code recognition engine. Accept the Google terms and conditions and let the QR reader installation begin.

- Open the email received from your Administrator and scan the QR code available in the email with your device. In the next screen, tap **OK** and then tap **Next**.

1. You need to scan below-mentioned QR Code on the newly formatted device Welcome screen.

2. Once the scanning is done, the device will be ADO enabled and the Seqrite MDM Client will be installed on the device.

Scan QR Code

3. Now, you need to follow the instructions on the registration wizard to complete the MDM Client enrollment.

Your admin has the ability to monitor and manage settings, corporate access, apps, permissions, theft-protection features and data associated with this device, including network activity and your device's location information.

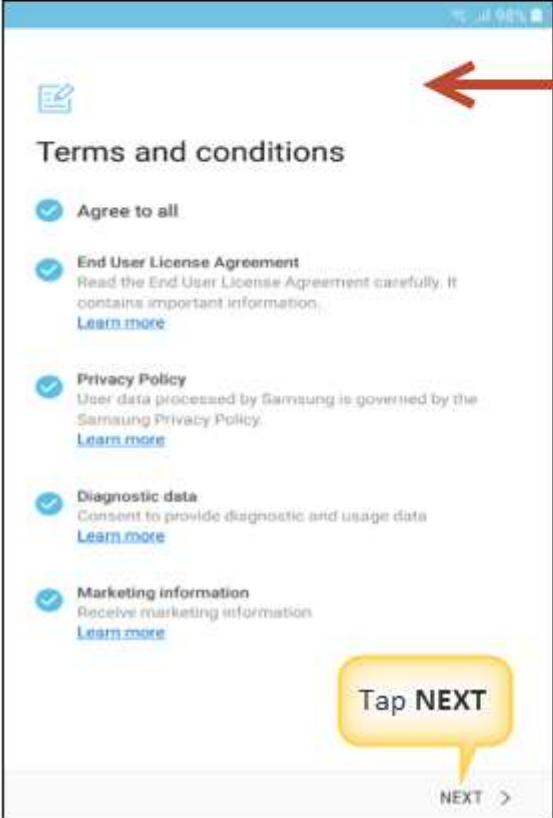

To use theft-protection features, you must have a password-protected screen lock for your device.

Contact your admin for more information, including your organisation's privacy policies.
